Lockheed Martin

Hello,

I was made aware of a Co-op opening on your website. Your website got my attention because of your work in defense programs. I am attempting to be an Engineer at your company. I am sure I can be a great asset to Lockheed Martin.

I am interested in this opportunity because I want to make relevant use of my engineering skills. My skills have been profusely practiced in the classroom on problems that involve Resistors, Capacitors and Inductors. I also have experience working at a radio frequency (RF) company. I was an intern for Bird Technologies, they make products such as Antennas and Filters. My internship developed not only my engineering skills but my communication skills as well. It included frequent verbal and written contact with my supervisor as well as the rest of the departments involved in producing and selling the products. I specifically want to use my skills at Lockheed Martin because of the company's work in aircraft. Electrical concepts for these aircraft are what I hope to develop for Lockheed Martin in order to support them. I believe my support can help Lockheed Martin accomplish their mission.

I can be reached by the E-mail or phone number above for any questions or concerns. Thank you for your consideration and for reviewing my credentials. I hope to hear from you.

Sincerely yours,
Andy Perez
